Instructor-Led Training (ILT)

OSForensics Certified Examiner (OSFCE) Course

<Description>

The two and a half day *OSForensics Certification Course* is the official product training course offered and developed by PassMark® Software, makers of OSForensics. This interactive course is intended to provide new users of OSForensics with the skills and knowledge necessary to effectively utilize OSForensics as a complete digital forensics and triage solution. The course will prepare students to successfully pass both the OSFTC (OSForensics Triage Certification) and the OSFCE (OSForensics Certified Examiner) certifications which will be administered at the end of the course.
