

# OSForensics

by PassMark Software

PASSMARK  
SOFTWARE

## Discover

Discover relevant data faster through high performance file searching and indexing. Extract passwords, decrypt files and recover deleted files quickly and automatically from Windows, Mac and Linux file systems.

## Identify

Identify evidence and suspicious activity through our hash matching and drive signature analysis features. Identify and analyze all files and even automatically create a timeline of all user activity.

## Manage

360° Case Management Solution. Manage your entire digital investigation with OSF's new reporting features. Build custom reports, add narratives and even attach your other tools' reports to the OSF report.

“Extract forensic data from computers, quicker and easier than ever. Uncover **everything** hidden inside a PC.”
